Corporate Philanthropy in Asia
Research-Based Pharmaceutical Companies
Introduction

A dozen nations and as many companies are represented in this, the first report by the Pharmaceutical Research and Manufacturers of America of philanthropic activities of the world’s leading research-based pharmaceutical companies in Asia.

The myriad philanthropic activities found in Corporate Philanthropy in Asia include well over 300 separate initiatives of a wide range of sizes, shapes and purposes. From the many instances of employees in a single office volunteering time and expertise in response to an isolated problem to the several multi-year, multi-million dollar partnerships involving numerous corporate, nongovernmental, governmental and multilateral organizations fighting diseases across continents, if not the globe, these corporate philanthropic activities together make life better for millions of people.

This commitment to philanthropy ought not to be entirely surprising. It reflects the values and decency of the thousands of men and women who work for pharmaceutical companies in these nations. For most where they work is where they were born and where their families are. They are giving back to their communities.

Similarly, the activities described herein reflect the commitment of the research-based pharmaceutical industry to relieve suffering and improve the health and well-being of people around the world.

Major Types of Activities

- Disaster relief
- Product donations
- Financial assistance
- Research
- Prevention, disease awareness and health promotion
- Patient education, counseling and support
- Training of health professionals
- Basic medical care, screening, immunizations and treatment
- Capacity- and leadership-building
- Food, clothing, shelter and infrastructure
- Education (Pre K-college)
- Science and medical education
- Micro-economic development
- Employee volunteer services
Table of Contents

Part I: Social and Health Programs ..............................................................01
Part II: Research & Development .............................................................49
Part III: Medicine Donations ..................................................................51
Part I: Social and Health Programs

AUSTRALIA

Redkite

- Since 2005 the children’s cancer charity Redkite has brought music therapy to more than 150 children with cancer. With annual funding of $56,000 from AstraZeneca, the program has produced positive results, according to most parents and staff. AstraZeneca

Heart Foundation of Australia

- A 2004 study by the Heart Foundation of Australia examined the link between heart health, stress and depression among the indigenous populations of Central Australia. Funded by Bristol-Myers Squibb, the study found that multiple sources of stress—socioeconomic disadvantages, unhealthy behaviors, poor access to healthcare, poverty and depression—may be responsible for high levels of heart disease. Bristol-Myers Squibb

Rural Health Education Foundation

- What began in 1992 as a Merck-funded pilot study with six satellite-receiving sites in rural Australia has become the Rural Health Education Foundation (RHEF)—an independent, not-for-profit organization whose 610 sites use satellite technology and the Internet to provide interactive, distance education for doctors and other health professionals in remote areas. It has improved the health and wellbeing of rural and remote Australians from Thursday Island to South East Tasmania, and from Norfolk Island to the Indian Ocean. Merck & Co., Inc.

- A 2004 grant from Merck funded RHEF research in Aboriginal health to determine the most pressing health education needs. Research confirmed the role that satellite technology can play in bringing health education to Aboriginal communities. Merck & Co., Inc.

In 2002 Merck & Co., Inc. was honored with an Australian Financial Review Sponsorship Award for its long-term involvement with RHEF. The judges described Merck’s support as:

“...an excellent example of best practice sponsorship... enterprising, pioneering and innovative and deserves special recognition. It was a true example of a well integrated and genuine mutually beneficial partnership.”
Supporting Science and Education

- Merck has made a major commitment to investing in Australian research and developing the scientists who will make breakthrough discoveries. Its many grassroots programs to encourage young people to pursue a career in science include:
  
  - The Australian Science Olympiads is a nationwide science competition that provides high school students with the opportunity to enhance their knowledge and understanding of biology, chemistry and physics. Top ten students compete in international competitions.
  
  - Merck scientists visit high schools to encourage students to take science courses and to pursue a science degree in college.
  
  - John Shaw, Ph.D. Fellowships fund research projects on an annual basis for top graduate students in science and health-related Ph.D. programs.
  
  - Three-year Indigenous Ph.D. Scholarship is awarded every three years to an indigenous Ph.D. student to support his or her research.

Merck & Co., Inc.

Local Community

- Merck provides major support to local community organizations, as follows:
  
  - Christmas gifts and food donations to the Holroyd Family Support Services for the families under its care.
  
  - Financial support to the NSW branch of CanTeen, a peer support network for adolescents living with cancer.
  
  - Environmental projects with local schools and city council.
  
  - Financial support to various community organizations that sponsor local activities (e.g., Rotary Club’s support for a local swimming pool).

Merck & Co., Inc.

Australia Medical Association Foundation (Western Australia)

- Pfizer and the Australia Medical Association’s Foundation (Western Australia) together created the Doctor-Youth Education Sessions (DR. YES), an innovative program that educates senior high school students
about mental health, sexual health, alcohol, illicit drugs, and healthy lifestyle. In 2005, over 200 medical students addressed 8,000 students at 66 schools in metropolitan and rural Western Australia, including aboriginal communities. Pfizer

Youth Friendly Doctor

- Created in 2004 the Youth Friendly Doctor program has provided about 300 doctors in 71 communities additional training in adolescent health issues and effective communication strategies, so they can better meet the health needs of young people. Pfizer

Australian Red Cross

- 80 young women—mostly pregnant or homeless and under age 19—and their children have received housing, financial support and education through the Australian Red Cross’s Young Women’s Health Program, in particular, the Glen Mervyn Center in Randwick, NSW. Wyeth has been a major contributor since 2000. Wyeth
- The Red Cross’s transplant coordination service and its Life Links campaign raise awareness of organ donation and encourage people to register, with support from and in collaboration with Wyeth, which also has a central role in supporting Awareness Week activities. Wyeth
- Approximately 30,000 ml of blood donated by local employees. Wyeth

Starlight Foundation

- With major funding from Wyeth, the Starlight Foundation has touched the lives of over 200,000 seriously ill children and their families. Its innovative Distractive Therapy includes programs for children that use fun and entertainment as positive distractions to pain and boredom. The company has made a three-year commitment. Wyeth

The Haemophilia Foundation Australia

- Financial support for The Haemophilia Foundation Australia, an organization that represents people with haemophilia, von Willebrand disorder and other related bleeding disorders and their families. Wyeth
CAMBODIA

Refugee Children of the World

- 3,000 children and teenagers have benefited from 13 activity centers operated by the NGO Refugee Children of the World, with support from sanofi-aventis. Located in Battambang, the nation’s second largest town, the centers are repairing the damage done by the Khmer Rouge to the educational system by providing opportunities for children to learn and play games. sanofi-aventis

The Chain of Hope

- With support from sanofi-aventis, a pilot project run by The Chain of Hope is helping prevent acute rheumatoid arthritis among children in the Pursat province. Of the 1,000 children operated on at the Cardiology Centre in Phnom Pen since 2001, as many as 50 percent were suffering cardiopathies of rheumatic origin. The company also donates extencilline. sanofi-aventis

World Vision

- A micro-economic development program, operated by World Vision with funding from Wyeth, provides small entrepreneurial loans that help residents of a small village start or expand business ventures. Its aim is to raise the economic health of the community and reduce poverty. Wyeth

CHINA

Operation Smile

- In China, Abbott has donated a total of $153,000 in products, mostly antibiotics and hospital supplies, to support the medical and humanitarian activities of Operation Smile and Medical Outreach Programs. Abbott

- Medical missions in 2006 have already used the Abbott-donated anesthesia, sevolflurane, to perform over 400 free reconstructive surgeries for children and young adults in the cities of Zhengzhou, Urumqi, Quijing and Nanjing. Abbott
Part I: Social and Health Programs

- In 2005 Abbott expanded its partnership with Operation Smile to include financial and technical support for its In-Country Physician Training Program. 380 indigenous pediatricians and anesthesiologists in nine countries have been trained in Advanced Life Support and Pediatric Advanced Life Support. In February 2006, another 96 physicians and healthcare workers from 15 cities in Hangzhou were trained. Abbott

Project Hope

- In partnership with Project HOPE, the Abbott Fund has helped train physicians at Zhongnan Hospital at Wuhan University in Hubei Province since 2004. In July of 2005, Abbott granted the program $20,000 to support 2005-2006 Train the Trainers activities, a program that since started in 2003, has trained 8,759 healthcare workers. Abbott

2003 SARS Outbreak

- Medical devices were donated to more than 300 hospitals in response to the SARS crisis. AstraZeneca

People with Disabilities

- A major sponsor of the 2007 Special Olympics, AstraZeneca was named “Friend of the Games” by the Special Olympics Executive Committee. AstraZeneca
- $25,000 donation to aid the poor and disabled as part of Wuxi New District’s Charity Day. AstraZeneca
- As sponsor of the Wheelchair Foundation, wheelchairs were purchased for people with disabilities. AstraZeneca
- Special Olympics athletes and their families received free tickets to the 2006 Shanghai Golden Grand Prix. AstraZeneca

Education

- Beginning in June 2005, a long-term partnership with Shanghai Luwan Special School has supported special education programs. The Maple Prize-AZ Fund for Special Education also recognizes special education teachers. AstraZeneca
- AZ contributes funds, computer equipment and employee volunteers to the Anhui Linquan Pharmaceutical Hope School. AstraZeneca
Anti-Smoking Program

- In May 2005, AZ, Wuxi city government and Wuxi Daily News Group jointly launched Wuxi Anti-Smoking Month to promote a healthy, no-smoking lifestyle. AstraZeneca

Chinese Foundation for Hepatitis Prevention and Control

- For the past 5 years a partnership with the Chinese Foundation for Hepatitis Prevention and Control has conducted a number of projects to increase education and awareness associated with Hepatitis B:
  - With funding from the Bristol-Myers Squibb Foundation, a two-year vaccination education program trained nearly 2,000 doctors and other healthcare workers in six rural areas in HBV prevention. The public was reached via local TV, schools and clinics. With vaccination rates increasing from 30 percent to as high as 97 percent, the program is being replicated throughout Shan’xi and Gansu provinces.
  - Targeting mother-to-child-transmission of HBV, China’s most frequent means of transmission, with an education and counseling program for young women in rural Gansu and Shan’xi. With funding from the BMS Foundation, the $200,000 program builds on the earlier success of a BMS-funded vaccination project. Also provided are free screenings and vaccinations and prevention education for providers.
  - With support from BMS Foundation, the CFHPC has engaged leading HBV experts to develop a comprehensive strategy to combat HBV. The paper will outline the escalating challenges, potential consequences and the need for aggressive interventions. Guidelines were developed for prevention and intervention programs, focusing on research and provider education. Bristol-Myers Squibb

China Center for Disease Control

- A $700,000 BMS Foundation grant funds an HIV/AIDS training and community mobilization program by the China Center for Disease Control’s AIDS Treatment & Care Office in the Guangxi Zhuang Autonomous Region. The capacity building initiative includes a training center for prevention and treatment for healthcare workers; other programs help create an environment of community support, care and acceptance for people living with HIV/AIDS. Bristol-Myers Squibb
Health Express

- GlaxoSmithKline participates in the Health Express program, donating medicine to remote areas in western provinces. GlaxoSmithKline

International Council of AIDS Service Organizations

- The International Council of AIDS Service Organizations—with support from the Bill & Melinda Gates Foundation, GSK’s Positive Action, the Canadian International Development Agency and the Danish International Development Agency—is battling lack of the political will, stigma and discrimination that hampers prevention. Capacity-building assistance in the areas of human rights, discrimination and advocacy is helping local groups pressure governments, community leaders and donors for more effective prevention (and treatment) services. Also identified are gaps in national prevention programs. GlaxoSmithKline

Leonard Cheshire Home

- GSK established China’s first Leonard Cheshire home in Kunming, where people with disabilities receive physical therapy and vocational training. A primary healthcare and convalescence fund also was established. GlaxoSmithKline

Local School

- A primary school for children from poor families was established. GlaxoSmithKline

SARS Prevention

- Medicine, medical equipment and healthcare material were donated to SARS prevention front. GlaxoSmithKline

China Red Cross Society

- The China Red Cross HIV Prevention and Care Program, the nation’s first, runs peer education workshops for at-risk young people, and their families and friends, living in Yunnan and Xinxiang. Over 16,000 people living with HIV/AIDS have participated. With support from the Australian Red Cross, the program has raised awareness and understanding of how HIV is transmitted; for every participant, its prevention message reaches five others, estimates say. Capacity-building assistance is helping replicate the program in other provinces. GlaxoSmithKline
- Generated awareness about leukemia and added 10,000 new donor names to the China Stem Cell Databank of the China Red Cross Society. Johnson & Johnson

**AIDS Policy Research Center**

- Working with the AIDS Policy Research Center at Tsinghua University, which is providing HIV/AIDS prevention for rural women in six cities in the Yunnan and Sichuan Provinces. Johnson & Johnson

**Reproductive Health**

- Working through UNICEF’s Safe Motherhood initiative, educating and encouraging women in remote areas of Tibet to give birth at healthcare facilities instead of at home. Johnson & Johnson

- Since 2004 trained more than 6,000 medical professionals across China in techniques of neonatal resuscitation as part of a collaborative Neonatal Resuscitation Program with the Chinese Ministry of Health, the American Academy of Pediatrics, the Chinese Society of Perinatal Medicine, the Chinese Nursing Society, and the Johnson & Johnson Pediatric Institute, L.L.C. Johnson & Johnson
The Lilly MDR-TB Partnership

- In 2003 Lilly launched a $70 million global initiative to fight the rise of multi-drug-resistant tuberculosis (MDR-TB), which infects an estimated 400,000 people each year, notably in China, India, South Africa, and the former Soviet Union. The Lilly MDR-TB Partnership is a multi-pronged, cross-sector initiative by 14 organizations to employ a comprehensive strategy of increasing the supply of drugs that can cure MDR-TB, train local healthcare personnel in the countries hardest hit by MDR-TB, and focus public attention on prevention, diagnosis and appropriate treatment, as well as the following:
  - Transfer Lilly’s proprietary manufacturing technology, enhance disease surveillance and training programs, and increase the supply of capreomycin and cycloserine, medications effective in the treatment of MDR-TB,
  - Ongoing transfer of drug-manufacturing expertise for both capreomycin and cycloserine to a major pharmaceutical company in China to increase the global supply of these products at a lower cost,
  - With funding from Lilly, experts from Purdue University are training scientists and plant managers from this company in manufacturing skills and good business practices. Lilly

HIV Prevention, Care and Support

- A public-private partnership was established by Merck and the Ministry of Health to provide prevention, patient care, treatment and support to HIV/AIDS patients. The Merck Company Foundation has committed $30 million over 5 years to this project, the largest effort of its kind to date in China. Programs, tailored to local needs, include a baseline survey to assess the epidemic’s reach; health worker and government leadership training; and expanded testing and counseling. Programs are being introduced in Sichuan Province, with the intent to expand to other areas. Merck & Co., Inc.

On June 27, 2006, the U.S. Department of State presented Merck with its prestigious Award for Corporate Excellence, which recognizes companies who exhibit exemplary corporate social responsibility in overseas markets.

“[Merck] deserves the honor, because it sets a good example through its powerful partnership with the Chinese Government in the health sector, (on matters such as) HIV/AIDS, hepatitis B and public healthcare,” said The Honorable Clark T. Randt, U.S. Ambassador to China.
Chinese Centre for Disease Control and Prevention

- Since 1989, when Merck transferred its gene-engineering hepatitis B vaccine-production technology to the Chinese Centre for Disease Control and Prevention for a token fee of $1, millions of newborn babies have had access to the vaccine in China, helping reduce the infection rate among children to 2 percent (one-fifth the rate among adults). Merck & Co., Inc.

Cancer Control Projects

- Pfizer contributed $200,000 in support of the American Cancer Society (ACS) Cancer Control Projects, including the ACS University which resulted in the training of 50 professionals in patient services, tobacco control and patient advocacy. Pfizer

- Grants amounting to $70,000 were provided to scholars who conducted research in smoking cessation and psychosocial support in oncology. Pfizer

HIV/AIDS Training Initiatives

- Project HOPE and Family Health International, with a $500,000 grant from Pfizer, are running HIV/AIDS training programs on capacity building in Hubei and Guangxi provinces. In the first twelve months of the program, a total of 500 healthcare workers and 6,000 members of the general public have been trained. Pfizer

- Through the Global Health Fellows program, Pfizer is providing colleagues to support organizations that are actively addressing the health needs of people in Africa, Asia, Eastern Europe and Latin America for three to six months. Two Pfizer Global Health Fellows have been assigned to a HIV/AIDS prevention project in Wuhan for four months, where they provided expertise in such areas as fundraising and development of multimedia materials. Pfizer

Lifeline Express

- Since 2003 Pfizer has contributed close to $200,000 and 1,428 artificial lenses to the Chinese Foundation of Lifeline Express. This charity, nicknamed Lifeline Express, is a train equipped with advanced medical equipment, traveling throughout China with leading ophthalmologists to aid people stricken with the blinding condition of cataracts. More
than half the patients living in poor and remote areas neither have access to nor can afford the surgery, and the Lifeline Express provides the means in which treatment can be delivered and patients’ eyesight can be restored. Pfizer

### SARS Outbreak Donations

- Pfizer donations to the Red Cross Society of China included $250,000 in medical masks, $200,000 for training and medical equipment, and 600 vials of Vfend, Pfizer’s anti-fungi medicine. Pfizer
- With support from Pfizer, the Mental Institute of Beijing and Ministry of Health provided mental health services to health workers who suffered depression post-SARS. Pfizer

### HONG KONG

#### Infectious Diseases

- A $500,000 Freedom to Discover Infectious Disease Grant from Bristol-Myers Squibb will support the work of Professor Ching-Lung Lai, M.D., of the University of Hong Kong Queen Mary Hospital. The grant program encourages science at its most creative—unrestricted funding, unfettered by commercial relationships, the need to justify any new directions to be taken or other similar constraints on innovation. Bristol-Myers Squibb

#### Hong Kong Regeneration Society

- The Family Tree Program, a joint initiative of the Hong Kong Regeneration Society and Novartis, offers patient education to people with cancer. Through performances, media coverage, and radio broadcasts, the program encourages patients to “never give up” and communicates the critical role of families in caring for cancer patients. Novartis

---

*For its role in the Family Tree Program, Novartis was awarded the 2006 Partnership Award and Caring Company by the Hong Kong Social Welfare Department.*
Pfizer Caring Hands

- Through Pfizer Caring Hands, employee volunteers work on health education programs in elderly homes, drug abuse prevention campaigns for teens, employment training for single parents and charity fundraising, among other things. Pfizer

SARS Outbreak Donations

- Approximately 500,000 N95 surgical masks were donated by Pfizer to doctors, nurses, pharmacists and health reporters to prevent further contraction. Pfizer
- The Pfizer Foundation donated $50,000 to the Hong Kong Hospital Authority’s SARS prevention campaign to promote hand washing. Pfizer

Tsunami Relief

- In 2005 Pfizer employees donated $20,000 to tsunami relief efforts. Pfizer

Society for the Aid and Rehabilitation of Drug Abusers

- Wyeth made cash and product donations totaling $26,000 to the Society for the Aid and Rehabilitation of Drug Abusers. SARDA offers counseling services and education seminars for pregnant mothers with drug abuse problems to help prevent birth-related morbidity and mortality issues. Wyeth

INDIA

Federation of Obstetric and Gynecological Societies of India

- The Safe Motherhood program, an AstraZeneca partnership with the Federation of Obstetric and Gynecological Societies of India (FOGSI), has made labor and delivery safer for mothers, through over 60 conferences for healthcare professionals and media campaigns. AstraZeneca
- With an AZ grant of $108,000, FOGSI’s SuPraBha Ganga Yatra—a 108 day, 2,400 km walkathon through five states, from the mouth of the Ganges river to its source—has built awareness and provided reproductive healthcare to 24,000 women at 81 health camps. AstraZeneca
Comprehensive Trauma Consortium

- Three years ago, AZ donated a fully equipped ambulance, which it maintains with a $40,000 grant, to the Comprehensive Trauma Consortium’s Operation Sanjeevini, a rescue service for road accident casualties and other emergencies. AstraZeneca

Katigenahalli School

- AZ’s support for the Katigenahalli school includes employee donations and volunteer services, including medical check-ups, vaccinations and building renovations and repairs, as well as donated desks, meals and clothing for over 150 children. AstraZeneca

Shishukalyan Snehi Swayamsevak Sanstha Trust

- Established in 1977, Shishukalyan Snehi Swayamsevak Sanstha trust offers education and healthcare to the women and children of the fisher folk community living in Worli Koliwada. The Gokul Balwadi offers young children instruction in alphabets, numbers, colors, etc., as well as health, nutrition and hygiene. 50 high school scholarships have been awarded; a counseling center provides psychosocial support. GlaxoSmithKline
- HIV/AIDS Helpline has handled over 50,000 calls from the infected and affected, answering questions about myths and misconceptions about HIV and AIDS. Community education programs also have been conducted. Over 156,000 have benefited to date. GlaxoSmithKline

Gramin Aryoghya Vikas Sanstha Trust

- Established in 1996, Gramin Aryoghya Vikas Sanstha Trust is implementing rural community interventions in villages in Sinnar Taluka, including a mobile health clinic, education, women self-help groups, community center, safe drinking water system and post office. GlaxoSmithKline
- In cooperation with Akanksha, Maharashtra Women’s Council, Cancer Patient Aid Association and the government, 15 tribal villages in Peth Taluka are receiving medical check-ups, free medicines and basic healthcare training from the mobile health clinic, which visits five villages every day and has seen approximately 10,000 tribals. GlaxoSmithKline
• A balwadi is providing basic education and nutritious meals for about 40 young children of the rag pickers community in a slum area called Amrapali in Nashik city. GlaxoSmithKline

**HIV Counseling**

• Mobile counseling services provided to HIV-affected people in India. Johnson & Johnson

**Blindness Prevention**

• Provided vitamin A supplements to 250,000 children in India to prevent blindness. Johnson & Johnson

**Multi-Drug Resistant Tuberculosis Partnership**

• In 2003 Lilly launched a $70 million global initiative to fight the spread of MDR-TB. The Lilly MDR-TB Partnership involves transferring Lilly’s proprietary manufacturing technology to partner companies; enhancing disease surveillance and training programs; and increasing the supply of capreomycin and cycloserine, medications effective in the treatment of MDR-TB. Lilly

• The ongoing transfer of Lilly drug-manufacturing expertise for capreomycin and cycloserine to a major pharmaceutical company in India will increase global supply of these products at a lower cost. Lilly

• With funding from Lilly, experts from Purdue University are training scientists and plant managers from this company in manufacturing skills and good business practices. Lilly

**Novartis Comprehensive Leprosy Care Association**

• The Novartis Comprehensive Leprosy Care Association, established by the Novartis Foundation for Sustainable Development in 1989, provides patients access to treatment, as well as provides disability management and facilitates physical and social care. The Foundation contributes close to $56,000 annually for disability care. Novartis

*Novartis Comprehensive Leprosy Care Association was recently given the Institute of Directors’ Golden Peacock Award for Innovative Services.*
Joint Efforts to Eradicate Tuberculosis

- The Joint Efforts to Eradicate Tuberculosis program was set up by Novartis to create awareness of the prevention and treatment of TB, through marketing, materials and www.ourjeet.com. Numerous detection clinics are conducted annually—to date, 15,000 patients have benefited from treatment. Annual program costs are about $56,000. Novartis

The Joint Efforts to Eradicate Tuberculosis program was awarded the prestigious Bombay Chamber Civic Award for Social Awareness.

Education and Training

- Novartis has made a five-year commitment, beginning in 2007, to fund annual scholarships, totaling $27,000, to the Indian School of Business, Hyderabad. The program will recognize women students with need and strong academic records. Novartis

- At Kalwe, a Vocational Training Center has enrolled 105 children and youth, training them in computer software and hardware, tailoring and motor winding. Novartis

Community Support

- Novartis support for Akanksha, an NGO dedicated to educating underprivileged children, has included a new center in Prabhadevi in Mumbai, annual financial contributions and volunteer service hours. Novartis

- Novartis outreach includes volunteer service hours, donated computers and printers, sponsorship of pre-school class in Mumbai for children with spasticity, talent competition for epilepsy patients, workshops for women with epilepsy, lunch program for abandoned and underprivileged children, and outdoor activities for mentally challenged young adults. Novartis
Disease Detection, Treatment and Prevention

- Since 2001 Novartis has conducted epilepsy camps to increase awareness of epilepsy disorders and diagnosis levels and to distribute disease awareness materials. In 2006 alone, more than 400 camps have been conducted, with about 5,000 patients diagnosed and treated. Novartis

- About 318 bone health check-up camps benefiting about 18,000 patients have taken place in 2006. Novartis’s camps also distribute disease awareness material. Novartis

- In 2006 more than 200 hypertension camps were conducted to increase awareness about hypertension and related disorders. Novartis

Mother and Child Healthcare Project

- Pfizer has supported the Mother & Child Healthcare Project in rural Haryana since 2002, in partnership with the Arpana Research & Charities Trust. In 41 villages, the project helps reduce anemia in pregnant women and adolescent girls through education, training and disease awareness; promotes community health, including diarrhea management, antenatal care, child nutrition and immunization; and identifies congenital abnormalities. Pfizer

Cansupport Mobile Home-Care

- Cansupport’s mobile home-care team of healthcare professionals, counsellors and drivers has delivered free palliative care and support to persons living with advanced cancer in East Delhi since 2004. As a partner, Pfizer funds salaries, the vehicle, medicine and other expenses. Pfizer

Multiple Sclerosis Society

- Pfizer supports the Multiple Sclerosis Society of India’s patient support groups through financial aid, product donations and organizational assistance. Its annual Multiple Sclerosis Walk, for example, creates disease awareness and raises money for MS patients. Pfizer

Economic Rehabilitation Project

- The World Vision International-Pfizer Economic Rehabilitation Project helps small entrepreneurs re-establish their businesses, offering grants and loans as working capital. The program aims to benefit the families
of 1,000 economically-disadvantaged people in eight villages, but mainly Nagapattinam town, Vailankanni Arukattuthurai and Tran-
qubar. Pfizer

**Pfizer Global Health Fellows**

- More than 10 Pfizer Global Health Fellows were assigned to Christian Medical College in Vellore, a leading research and medical facility in southern India. Pfizer

**Science Laboratory**

- A new science laboratory was built in a school in the tsunami-stricken area of Nagoor, Nagapatinam. Pfizer

**Mumbai Flood Relief**

- After the floods that swept Mumbai and parts of Maharashtra in July 2005, Pfizer donated money and products, including 800,000 tablets of Doxycycline 100mg (Vibazine), to the Brihanmumbai Municipal Corporation and other NGOs, when an outbreak of leptospirosis emerged as a major health epidemic. Pfizer

**HIV Disease Management**

- With support from the Pfizer Foundation, a partnership between Y R Gaitonde Center for AIDS Research and Education, Chennai and The Fenway Institute of Fenway Community Health (of Boston) will run a three-month fellowship program for physicians in HIV medicine. The fellowship includes ongoing, online training in clinical and research capabilities. Pfizer

**INDONESIA**

**Product Donations**

- In Indonesia, Abbott has donated a total of $4.64 million in medicines (including $4.5 million in antibiotics), vitamins, nutritional supplements and hospital supplies to AmeriCares, Direct Relief, Heart to Heart International, MAP and Project Hope to support relief and humanitarian programs by CHF International, Muhammadiyah, USNS Mercy and International Relief and Development. Abbott
Takengon Midwifery Academy

- With support from GlaxoSmithKline, JHPIEGO (an affiliate of Johns Hopkins University) is collaborating with district and provincial health offices and the Indonesia Midwives Association to build the capacity of the Takengon Midwifery Academy (Akbid Takengon) in Aceh Tengah. The aim is to provide high-quality training and raise the quality of maternal and newborn care services. Nearly 600 midwives from Aceh were killed, evacuated or lost their clinics during the 2004 tsunami, significantly impacting maternal and child healthcare in the district.

Project Hope

- With support from Pfizer, Project Hope operates the Mobile Health Caravan in remote areas, providing follow-up care to victims of the Yogyakarta earthquake, as well as general medical care. Pfizer Indonesia fellows travel with the caravan, offering medical assistance.

Post-Traumatic Stress Disorder Treatment

- A $150,000 grant from Pfizer underwrote the training of five psychiatrists from Cipto Mangunkusumo Hospital in Jakarta at the University of Pennsylvania to become trainers in Cognitive Behavioral Therapy technique to treat PTSD patients.
- Currently under development is a national mental trauma center in Pusat Kajian Bencana and Tindak to deal with disasters.

Local Schools Initiative

- Pfizer employees help local schools renovate to meet health standards, teach healthy behavior and establish Healthy School Management programs, which seek to maintain healthy behavior in the school. Their work has been recognized by the Ministry of National Education and Ministry of Health.

Public Health Laboratory

- Pfizer contributed more than $600,000 to establish a Public Health Laboratory in the Indonesian province worst hit by the tsunami. The laboratory employed locally trained technicians and monitored infectious disease outbreaks.
Community Outreach

- Pfizer’s Open Your Heart & Help Others raises employee contributions, matched by the company, for community outreach activities and in-kind donations to the Multi-Disabled Shelter; Indonesian Red Cross for the Merapi Volcano Refugees Camp; Male Juvenile Prison; and earthquake victims in Jogjakarta & Central Java. Pfizer

May 2006 Earthquake Relief

- Immediately after a 6.2 magnitude earthquake hit Yogyakarta and Central Java in May 2006, Direct Relief International, Project HOPE, AmeriCares, and Abbott rapidly deployed donated essential medicines such as antibiotics, vitamins, nutritionals, anesthetic agents and anti-inflammatories. Abbott

- $11,000 in products were donated to four hospitals in the affected areas. AstraZeneca

- Save the Children-Indonesia Earthquake Children’s Fund received a $100,000 donation from Merck; $253,000 in products were donated to NGOs and community organizations working on relief efforts. Merck & Co., Inc.

- Immediately following the earthquake, in the town of Yogyakarta in Java, a sanofi-aventis subsidiary made drugs available on the spot and free of charge. The French NGO Tulipe, in partnership with sanofi-aventis, sent 2 tons of emergency kits. sanofi-aventis

- With support from sanofi-aventis, Handicap International is providing assistance to individuals affected by the earthquake regarding the purchase of wheelchairs, crutches, plaster bandages, etc., and prevention of complications and secondary handicaps among the injured. sanofi-aventis

- 18,000 people living in the Bantul and Klaten districts are receiving drinking water, sanitation, basic living items and emergency food aid, thanks to a partnership between sanofi-aventis and Solidarities Association. sanofi-aventis

- Antibiotics, anti-fungals, anti-infectives, antihistamines and other products were donated to U.S.-based and local humanitarian aid organizations working in areas affected by the earthquake, including Pusat Kajian dan Perlindungan Anak, CHF International, and Muhammadiyah. Schering-Plough also provided financial assistance. Schering-Plough
• Schering-Plough employees volunteered alongside medical personnel at hospitals within their districts, assisted in other relief capacities and made cash donations. Schering-Plough

**2004 Tsunami Relief**

• In the immediate aftermath, Abbott Fund donated $750,000 to the American Red Cross for its emergency relief efforts. Recently, the ARC selected Abbott to participate in a five-day trip to Bande Aceh to evaluate the progress in restoring communities devastated by the tsunami. Abbott

• Products donated to help people in Aceh who are still living in evacuation areas following the tsunami. AstraZeneca

• Working with the Rotary Club Australia, AstraZeneca committed $300,000 to construct children’s villages in Bande Aceh, where orphans will be placed with surviving families of the tsunami. AstraZeneca

• Johnson & Johnson committed several million dollars in cash and medical products to the relief and rebuilding efforts, working with several partners, including International Rescue Committee, MAP International and Direct Relief International. In Bande Aceh, Indonesia, Johnson & Johnson supported the development of a medical equipment repair facility to help local hospitals resume critical care. Collectively, these hospitals serve 4 million people in the Aceh Province. Johnson & Johnson

• $150,000 in broad spectrum anti-biotic medicines—Zithromax tablets and Unasyn IV—were donated by Pfizer and the Pfizer Foundation to local health clinics, through Pfizer’s partner CARE International. Pfizer

**MALAYSIA**

**Disaster Relief**

• Working through the Red Cross, AstraZeneca established a $750,000 emergency logistics center in Kuala Lumpur, to provide immediate shelter and supplies for about 10,000 people in the event of future disasters. AstraZeneca

**Malaysian AIDS Council**

• It Begins with You program, launched at two universities in 2005, is inspiring medical students to become HIV/AIDS healthcare providers. The joint Merck-Malaysian AIDS Council initiative raises awareness of
the epidemic, taking an interactive approach that relies on exhibitions, performances and Q&A sessions. Merck & Co., Inc.

**Arthritis Foundation Malaysia**

- The Arthritis Foundation Malaysia and Merck together have commemorated World Arthritis Day with public awareness programs. Art in Action for Arthritis awareness and fundraising campaign is one of many on-going initiatives organized over the years. Merck & Co., Inc.

**Malaysian Osteoporosis Society**

- Merck together with the Malaysian Osteoporosis Society launched a public awareness program in 2005 in conjunction with World Osteoporosis Day. The Visit the Doctor campaign raised awareness and encouraged at-risk individuals to speak to their doctors. Merck & Co., Inc.

**Pfizer Care-A-Van**

- Since 1999 the Pfizer Care-A-Van has provided free health screening and education to more than 80,000 Malaysians living in less privileged, rural and semi-urban communities. Pfizer

**Patient Assistance Program**

- Since 2001 Pfizer’s Patient Assistance Program has provided financial assistance to more than 40 heart patients seeking treatment at the National Heart Institute. To date Pfizer in Malaysia has invested nearly $300,000 on this initiative. Pfizer

**Health Partnership Program**

- Pfizer’s Health Partnership Program empowers patient groups with knowledge and skills. Eight NGOs have received funding for programs in palliative care, Parkinson’s disease education, and breast and cervical cancer screening. Pfizer

**Breast Cancer Awareness**

- The National Council of Women’s Organisations and cancer patient support groups, with support from Pfizer, have developed a training module on breast cancer awareness and prevention. It will target men to increase their awareness and support of screening and will be rolled out throughout the country. Pfizer
**Pfizer Book Prize**

- Since 1984 the Pfizer Book Prize and cash award has been awarded to top graduating students of public universities for outstanding achievements in medicine. Pfizer

**Tsunami Relief Efforts**

- Pfizer’s financial contribution to the Tsunami Disaster Fund supported relief efforts by the government in the coastal areas affected by the Tsunami in Penang and Kedah. Contributions in the form of fishing boats, nets, medicines and other supplies were also made to fishermen in the affected areas to enable them to get back their livelihood. Total contributions were valued at nearly $50,000. Pfizer

**PHILIPPINES**

**Mudslide Disaster Relief**

- In February 2006 a landslide killed more than 1,000 people on Leyte Island. At the request of the Catholic Medical Mission Board, Abbott provided immediate access to enough critical medicines such as Biaxin, erythromycin, and multi-vitamins to care for more than 50,000 rescue workers, displaced families and survivors. Abbott

**Product Donations**

- In the Philippines, Abbott has donated a total of $1.6 million in medicines (including $1 million in antibiotics), vitamins, nutritional supplements (including $552,000 in infant nutritionals) and hospital supplies to AmeriCares, Heart to Heart, MAP and Catholic Medical Mission Board to support relief and humanitarian activities by the Sovereign Military Order of Malta, Province of Bohol, Medical Outreach Programs, Misamis Occidental Mission and Operation Smile. Abbott

**Operation Smile**

- Since 2002 Abbott has been Operation Smile’s sole source of sevoflurane. In 2006 the Abbott-donated anesthesia has been used to perform over 440 free reconstructive surgeries for children and young adults in the cities of Cebu and Davao. Abbott
Disaster Relief and Aid for the Poor and Sick

- As a member of the Pharmaceutical and Healthcare Association of the Philippines, AstraZeneca supports its philanthropic foundation. Since 2003, $20,000 in medicines has been donated annually for indigent patients and disaster victims; AZ also participates in joint programs with the Philippine National Red Cross and the National Disaster Coordinating Council, among others. AstraZeneca

- Medicine donations to medical-dental missions; medicine, food, clothing and other basic necessities, along with employee contributions, donated to aid typhoon and flood victims. AstraZeneca

- Christmas party and gifts, medicines and a cash donation were given to Tala Leprosarium, a sanitarium that serves elderly leprosy patients. AstraZeneca

- Christmas program, including gifts, for cancer patients at the PGH-Cancer Institute; medicines also donated. AstraZeneca

Aid for Children

- The Young Adults Program of the Virlanie Foundation provides residential care to over 300 street children; also provided are personality development training, career planning and job placements. AZ also sponsors three college students. AstraZeneca

- The Star of Hope provides basic education to poor and destitute children, through its own day care centers and elementary and high schools. With support from AZ, food also is distributed to typhoon victims. AstraZeneca

- For the past 15 years, Christmas parties have been held for underprivileged children living in the Edison area. AZ also runs medical-dental missions there. AstraZeneca

- A day of activities for 40 young children and orphans from Hospicio de San Jose. AZ Philippines also made a donation to the hospice to celebrate winning the company’s Safety, Health, and Environment Award. AstraZeneca

Habitat for Humanity

- In 2004 Habitat for Humanity Philippines built six houses south of Manila with the assistance of 148 AZ volunteers and their partners. AZ also donated $12,000 and conducted a medical-dental mission in the area. AstraZeneca
Save La Mesa Dam Watershed Project

- Support for the ABS-CBN Foundation Bantay Kalikasan’s Save La Mesa Dam Watershed Project, which is managing re-forestation and conversion of the watershed into a biodiversity reserve. Since 2000 some 105 AZ volunteers and their families have helped plant trees. AstraZeneca

Pinoy Health Pass

- Since 2002 the Pinoy Health Pass has provided free health insurance to over 75,000 underprivileged people. Initiated by GlaxoSmithKline in partnership with the Philippine Health Insurance Corporation (PHIC), it’s the first joint private sector-government initiative to make quality care accessible to the poor. GlaxoSmithKline

Family Health and Wellness Program

- With a $370,000 grant from GSK, a three-year health education program, reaching over 200,000 families, is promoting healthy behavior among beneficiaries of the PHIC’s Sponsored (Indigent) Program. GlaxoSmithKline

TB Treatment

- Since 2003 the Teacher-Child-Parent Laban Sa TB education program, in partnership with the Department of Education, has served 1.5 million children annually in elementary schools nationwide. GlaxoSmithKline

- The Directly Observed Treatment, Short Course (DOTS) Laban Sa TB project demonstrated the effectiveness of family members as treatment partners for TB therapy. The 2003 project involved 1,300 patients. GlaxoSmithKline

“Over the years, the GSK Foundation has shown just how much the private sector can contribute to changing the plight of poor Filipinos. By healing the sick through its medical programs..., the GSK Foundation is certainly helping Filipinos get a fighting chance for a better future.”

 Philippine Business Magazine

International Council of Nurses

- The International Council of Nurses, with support from Eli Lilly and Company, has developed training guidelines for nurses on detection,
treatment and management of the disease. ICN also launched a TB/MDR-TB “training of trainers” program for nurses in South Africa, which has been extended to the Philippines. *Lilly*

**Leaders for Health Program**

- Close to 1 million people in 39 medically underserved areas have benefited from Leaders for Health. With $1.2 million in grants from Pfizer, the four-year program, run jointly by the Department of Health, Ateneo de Manila University and Pfizer, produces leaders who develop and implement effective strategies and good governance practices for local healthcare systems. It received the “People Power People Award” from former President Corazon Aquino. *Pfizer*

**Gawad Kalusugan-Pfizer Program**

- Gawad Kalusugan-Pfizer Program is a three-year multi-sector development program—created by NGO Gawad Kalinga, with a $150,000 grant from Pfizer—that brings together leaders from marginalized communities for training in health management, disease prevention and health information systems. *Pfizer*

**Health Promoting, Diabetes Preventing Schools**

- Pfizer and the Philippine Association of Diabetes Educators teamed up to create Health Promoting, Diabetes Preventing Schools. It teaches administrators, teachers, parents and students practical ways to prevent diabetes and achieve a healthy lifestyle. *Pfizer*

**Engage**

- Pfizer’s Engage program sends employee volunteers to underprivileged communities to work with partner NGOs in promoting education and healthy lifestyle. Around 200 employees have conducted training workshops on proper nutrition and hygiene for mothers; academic sessions and educational tours for school children; and leadership skills training for youth leaders. *Pfizer*

**National Institutes of Health-Philippines**

- Pfizer partnered with the National Institutes of Health-Philippines to create Research Fellowships in support of local studies of public health concerns that affect large segments of the population. Fellows participate in research capacity-building workshops and receive grants worth $25,000. *Pfizer*
Advocacy Program for Childhood Leukemia

- The Leukemic Indigents Fund Endowment Foundation program, with funding from Pfizer, increases public awareness of childhood leukemia. The $50,000 grant also assists a support group and pays for healthcare for underprivileged patients. Pfizer

Youth Science Research Program

- To promote scientific research, Pfizer donated a research hub with state-of-the-art facilities to the Philippine Science High School in Western Visayas. Also awarded is an annual grant to support student research projects. Pfizer

SINGAPORE

Scholarships and Educational Support

- A $32 million trust fund, created by GlaxoSmithKline in collaboration with the Economic Development Board, provides scholarships for undergraduate and postgraduate studies. GlaxoSmithKline

- $635,000 contribution to the Lee Kuan Yew School of Public Policy. GlaxoSmithKline

- Collaboration on scholarships and on-the-job training with the National University of Singapore, National Technological University and Nanyang Polytechnic. GlaxoSmithKline

- In an effort to stimulate interest in science, collaboration with the Singapore Science Centre on its chemistry exhibition. GlaxoSmithKline

Community Outreach

- Over the years, GSK employees have worked with the National Council for Social Service, National Volunteer Society of Singapore, Singapore Leprosy Relief Association, Spastic Children’s Association of Singapore, Gracehaven home for children, and the Society for the Visually Handicapped. GlaxoSmithKline

- Employee and company matching contributions to the Red Cross Tsunami Humanitarian Assistance in 2005 and SARS Courage Fund in 2003. GlaxoSmithKline
Cash donations and employees’ participation in community charity programs organized by healthcare organizations and other institutions. GlaxoSmithKline

Gracehaven is a residential home for up to 160 at-risk young persons who come from dysfunctional families. For the past five years, GSK volunteers have assisted staff members on activities that are designed to encourage the residents to reach their potential. GlaxoSmithKline

Singapore Leprosy Relief Association

Since 1984 GSK has been supporting the Singapore Leprosy Relief Association home, which provides food, lodging, recreation and healthcare services for ex-leprosy patients. Through events organized by GSK volunteers, patients have been able to rebuild their confidence and integrate into society. GlaxoSmithKline

Patient Empowerment Project

In 2004 two patient societies, the Asthma Association and National Arthritis Foundation, each received a $26,000 grant from Merck to educate their members and the public about the diseases so they could have more meaningful interaction with their doctors. A patient empowerment Web site and a patient booklet were developed. Merck & Co., Inc.

Charities for Children

Over the years, Merck and its employees have made significant contributions to children’s care and services organizations, including the Chen Su Lan Methodist Children’s Home and St. John’s Home. Merck & Co., Inc.

In 2004 Merck and its employees raised $15,000 in contributions to the Children’s Cancer Foundation. Merck & Co., Inc.

In 2005 Merck and its employees raised $26,000 for the Canossaville Children’s Home, a care and services organization that provides tailored interventions and educational support for children in need and their parents. Support has continued in 2006 with Merck employee volunteers installing an irrigation system in the school garden. Merck & Co., Inc.

My Happy Healthy Family

My Happy Healthy Family is a joint public-education initiative by the Singapore Cancer Society and the Singapore Heart Foundation. Spon-
sored by Novartis, it’s raising public awareness of cancer and cardiovascular disease through a media campaign, continuing medical education, health screenings at 36 clinics, materials, Web site, family history research tools and risk assessment checklist. Novartis

**Singapore Heart Foundation**

- In partnership with the Singapore Heart Foundation, Novartis launched the BP OK program to help doctors achieve blood pressure targets among their patients, through systematic and timely monitoring of patient compliance and data collection. Novartis

- The Singapore Heart Foundation’s Jump Rope for Heart program offers awareness and health promotion activities for primary school students. Since its inception in 1999, about 50,000 students from 50 schools have benefited. Novartis

- Go Red for Women, a women’s health initiative created by the World Heart Federation and adopted by the Singapore Heart Foundation, is educating women on the risk factors of cardiovascular diseases and encouraging regular health screenings. Novartis

- Between 2002 and 2005 Pfizer donated $257,000 to the Singapore Heart Foundation for its patient support, financial assistance and community education programs, as well as research and development of new treatments. Pfizer

**Singapore Cancer Society**

- Since 2003 Pfizer and its employees have supported the Singapore Cancer Society’s programs in education, research and patient care services, with donations totaling more than $200,000, as well as volunteer services. Pfizer

**Women’s & Children’s Healthcare Foundation**

- The Women’s & Children’s Healthcare Foundation, with support from Pfizer, is developing a peer education and counseling program for HIV prevention for college and high school students. Four schools and 1,200 students have enrolled since 2005. Pfizer

**Community Involvement**

- Pfizer regularly involves employees in various volunteer activities to reach out to the less fortunate groups in our society, for example, the elderly in nursing homes and children from less privileged families. Pfizer
2004 Tsunami

- Pfizer employee and company donations totaling $30,000 were given to the Singapore Red Cross Society for disaster relief for people affected by the Tsunami. Pfizer

SOUTH KOREA

Korean Cancer Society

- Since 2005 AstraZeneca has supported Seeking the Light, a cancer awareness campaign in partnership with the Korean Cancer Society, with donations of $180,000. It promotes constructive discussion among stakeholders to bring about needed policy changes. AstraZeneca

Korean Urology Association

- The Blue Ribbon Campaign, launched in 2004, focuses on raising awareness of prostate cancer and the importance of early check-up. Besides donating $150,000, AZ developed the campaign jointly with the Korean Urology Association. AstraZeneca

Hope Fund Scholarship Program

- With support from AZ and its employees, the Hope Fund Scholarship Program has provided 30 children of cancer patients with economic and emotional support. To date, $40,000 has been donated, and AZ expects to contribute $70,000 in 2007. AstraZeneca

Korean Association for the Study of Liver

- Every year since 1999, a concert, led by world renowned violinist Dong-Suk Kang, has been held in five cities to raise money for the Korean Association for the Study of Liver’s chronic hepatitis B patient education and disease awareness program. Kang also is the program’s honorary ambassador. GlaxoSmithKline

Korea Association for Suicide Prevention

- Support for suicide prevention campaign by the Korea Association for Suicide Prevention. GlaxoSmithKline
Medical Education

- GlaxoSmithKline awarded research grants to the Korean Association for the Study of the Liver and, through Korean Neuropsychiatric Association, to doctors specializing in the central nervous system. **GlaxoSmithKline**

- Book donations to medical school libraries, as well as disaster relief contributions. **GlaxoSmithKline**

Sharing Love, Saving Life Campaign

- Through its Sharing Love, Saving Life Campaign, Novartis, in collaboration with the Korea Heart Foundation, provides financial support to patients with severe heart diseases. To date, 18 patients have benefited. **Novartis**

Korea-Swiss Biomedical Symposium

- With the Korean Ministry of Science and Technology, Novartis held the first Korea-Swiss Biomedical Symposium in 2004 about neuroscience. The second symposium in 2005 focused on cancer research and was sponsored with the Korea Health Industry Development Institute and Ministry of Health and Welfare. The third symposium was held in May 2006. **Novartis**

Bio-Camp with College Students

- More than 80 students studying pharmacy, medical science, biotechnology and other life sciences attended Novartis’s first Bio-Camp in 2005, where they met and shared ideas with leaders in biomedical science. **Novartis**

Korea Breast Cancer Society

- Since 2002, the Korea Breast Cancer Society’s on-line breast cancer registry, with support from Novartis, has sought to identify epidemiological characteristics typical to Korean women with breast cancer and to further develop therapeutic algorithms tailored to Korean patients. The registry is the first of its kind in the world. **Novartis**

Korean Association for Leukemia and Blood Diseases

- Novartis sponsored the first-ever International Multiple Myeloma Foundation Conference in May 2006. Hosted by Korean Association for
Leukemia and Blood Diseases (KALBD), the event drew 500 patients and their care givers. Novartis

- To increase public awareness of iron overload in patients with repeated transfusions, Smile public lecture program was held in Seoul in September 2006, in collaboration with the KALBD and the Korean Society of Blood Cancer. Novartis

Community Outreach

- As many as 350 employees have participated in Novartis’s annual Community Partnership Days. Past focuses have included: environmental preservation; community service for children who have a disability or are homeless or mentally retarded; education; and fundraising for patients with leukemia and for the Korean Foundation of Blood Cancer. Novartis

Programs for Patients

- Since 2002 Pfizer has annually hosted Pfizer Paint Fest in conjunction with the Foundation for Hospital Art. It aims to help patients overcome their diseases and bring them comfort by offering them a chance to work with other patients, their families, medical teams and Pfizer volunteers in enriching hospital walls and ceilings with cheerful artwork. Pfizer

- In addition to Pfizer sponsorship, employees ran in the Terry Fox Marathon to support a public fundraising event for cancer patients and cancer research in 2005 and 2006. Pfizer

Academic Scholarships

- Since 2002 Pfizer Scholarships of Love have helped about 10 students from unemployed families annually, awarding them college scholarships totaling $600,000. Operated with Partners for the Future Foundation, the program is funded through employee contributions and company match. Pfizer

- Over 100 medical students received close to $1.4 million in scholarships funded by Pfizer in 2003, 2005 and 2006. Pfizer

Prize for International Contributions to Medicine and Academic Research

- The Korea Medical Association and Pfizer established the KMA-Pfizer Special Prize for International Contributions to Medicine in 2006 to promote the nation’s contributions to global healthcare and to inspire physicians to pursue international roles in medicine. Pfizer
Pfizer, in partnership with the Korea Academy of Medical Sciences, launched the Pfizer Medical Research Awards in 2000 to support and promote academic research in the clinical and basic research fields. Pfizer

Community Outreach

- Since 2004 employee volunteers have held monthly Pfizer Flea Markets of Love, where donated items are sold at flea markets organized by the Beautiful Store. All proceeds are donated to the Beautiful Store, which has recognized Pfizer’s events as Best of the Month, Best Participant and Best Donator of the Year. Pfizer

Disaster Relief

- In 2005 Pfizer and its employees donated funds and goods for victims of the Tsunami, through the Korea International Foundation of Health and Development. Pfizer
- Pfizer employees donated $106,000 to victims of torrential rains in the summer of 2006. Many people lost their properties and lives. Pfizer

TAIWAN

Taiwan Health Reform Foundation

- The Taiwan Health Reform Foundation, with a grant from Merck, is working to establish safer dispensing conditions of milling and mixing medicines for children. Merck & Co., Inc.

New Light Program

- The three-year-old New Light Program promotes cultural exchange and educational development in an aboriginal village. Novartis

Asia-Pacific Education Center of Hematology/Oncology

- Novartis recently teamed up with the National Center of Excellence for Clinical Trials and Research and the National Health Research Institutes to create the Asia-Pacific Education Center of Hematology/Oncology. The aim is improve the quality of clinical trials in hematology and oncology. Novartis
Biotechnology Leadership

- To support the development of biotechnology, Novartis sponsors the annual International Biotechnology Leadership Camp where young science students meet and share ideas with biomedical experts from Europe and Asia. Novartis

- On Novartis Taiwan’s 10th anniversary, the first Taiwan-Swiss Biomedical Symposium was held to encourage information sharing and collaboration between Taiwan and Switzerland. Novartis

- Support for the “Biomedical Technology Island,” a project developed by Academia Sinica, Department of Health, National Health Research Institutes and National Science Council, to make Taiwan a center for genetic medicine and clinical research. Novartis

Community Outreach

- Novartis was recognized as a “caring and curing company” by the patients and general public due to three programs organized with the endorsement of the Ministry of Health. The Five Generation Campaign (2004), Health Lecture (since 1994), and Doctor’s Day Charity Concert (since 1993) have promoted the importance of healthy lifestyle and physician-patient education. Novartis

John Tung Foundation

- A $300,000 grant from Pfizer and the Pfizer Foundation is funding the John Tung Foundation’s two-year mental health project that gives teenagers tools to deal with depression and to prevent suicide. Pfizer
Taiwan Root Medical Corp

- Since 1999 Pfizer has supported the Taiwan Root Medical Peace Corps, a team of doctors and volunteers that has held 63 free clinics for indigenous populations living in remote mountain villages, as well as six clinics overseas. Donations also include free cardiovascular and gastrointestinal medicines. Pfizer

TJCHA, Taiwan Joint Commission on Hospital Accreditation

- TJCHA (Taiwan Joint Commission on Hospital Accreditation) has been devoted to helping the patient safety committee under the Department of Health improve medical safety. Its tasks include: collecting evidence and researching the current situations of medical organizations’ involvement in executing patient safety, providing education programs, developing health education leaflets, and establishing a patient safety Web site. The long-term goals aim to establish a voluntary reporting system for both health providers (medical staff and medical organizations) and consumers (patients). Pfizer

National Association of the Promotion of Community Universities

- This association, built in 1999 with 39 networking community colleges, promotes continuing education in the community, focusing on topics that include disease awareness and cultural, economic and social issues. Approximately 20,000 people have attended 250 lectures, and this is one of the most popular lectures in Community Colleges in Taiwan. Pfizer

THAILAND

Tsunami Disaster Relief

- In December 2004 donations totaling $85,000 were made to the immediate relief efforts following the Asian tsunami. AstraZeneca

- Eight houses and a community center were rebuilt in Khao Lak, the worst hit area in Thailand, through a $100,000 donation to the Reconstruction Project. AstraZeneca
Environmental Restoration

- In October 2006 to mark the 60th anniversary of the king’s accession, AstraZeneca employees participated in a government initiative to plant a forest in southern Thailand. The aim is to renew depleted mangrove forests and protect the coastline and biodiversity. AstraZeneca

Pharmacy Council of Thailand

- Support for the Pharmacy Council of Thailand’s Pharmacy Week, which promotes the proper use of medicines. AstraZeneca

Population and Community Development Association

- With support from Bristol-Myers Squibb Foundation, the Population and Community Development Association will provide family planning, HIV/AIDS and sex education for teenagers in 30 schools in Bangkok and elsewhere in the region. The initiative includes a camp to train teachers and students to run programs, a mobile classroom, materials, hotlines, drop-in centers and Web sites. Bristol-Myers Squibb

Thai Red Cross

- The Thai Red Cross brings life skills and HIV/AIDS education to children and youth living in Bangkok slums. Funded by the BMS Foundation and completed in 2004, the project mapped slum areas for children, formed partnerships with local leaders, assessed needs and awareness and provided education programs. Bristol-Myers Squibb
- GlaxoSmithKline donated ARV medicines to the Thai Red Cross in 1996-2000 and has supported numerous disease awareness and educational programs valued at $222,000. For example, “For Longer Life” program ran in partnership with the Thai Ministry of Public Health and aimed to educate people living with HIV/AIDS. GlaxoSmithKline

Raks Thai Foundation

- GSK’s Global Community Partnerships, working with the Raks Thai Foundation, support some 160 families in fishing communities in Krabi and Pang Nga provinces, helping them rebuild their lives and livelihoods through a revolving fund that enables families to purchase boats, engines or fishing equipment. The funds are managed by the communities themselves, and are part of a long-term rehabilitation plan for their area. As each loan is repaid, the money is made available to another family. A
part of a $285,000 grant supports rehabilitation activities relating to health and livelihood improvement, natural and environmental management, emergency response and disaster risk management, and social networking. GlaxoSmithKline

**Rural Nursing Excellence Program**

- In 1997, with rural areas facing a severe nursing shortage, GSK, in cooperation with the Ministry of Public Health, Public Welfare Department, and International Support Group, established the Rural Nursing Excellence Program. The on-going program has awarded over 400 scholarships at 30 nursing colleges; about 250 students have graduated and are working in 120 hospitals and public health centers in 50 provinces. These community nurses have become increasingly vital in providing healthcare services in remote areas. GlaxoSmithKline

**The Life Skills Foundation**

- The Life Skills Foundation provides life skills education, training and promotion for children and their families affected by HIV/AIDS. It emphasizes psychosocial development to help reduce stigma and discrimination associated with the disease. With support from Johnson & Johnson in 2006, the Foundation assisted 169 children and their families in seven sub-districts of Upper Northern Thailand. More than 1,600 non-affected children learned about the disease and ways to maintain positive attitudes toward the affected children. Johnson & Johnson

**Rainbow Camps**

**Enhancing Care Initiative**

- The Enhancing Care Initiative, launched in 1998 with a five-year, $5 million grant from The Merck Company Foundation, is a joint program of the Harvard AIDS Institute and the François-Xavier Bagnoud Center at the Harvard School of Public Health. It works to improve the care of people living with HIV/AIDS in resource-limited settings in Thailand and elsewhere, by identifying and supporting approaches to HIV/AIDS care that are effective, pragmatic, and tailored to the needs and resources of the country. Merck & Co., Inc.
**HIV/AIDS Care**

- Merck contributed $1.1 million to support a program jointly conducted by Chiang Mai University’s Faculty of Nursing and the Harvard AIDS Institute to improve HIV/AIDS healthcare services. *Merck & Co., Inc.*

- Pfizer has provided five Global Health Fellows to work on community-based projects with vulnerable populations at high-risk for HIV/AIDS. *Pfizer*

**Pa Tong Koh Project**

- Pa Tong Koh (PTK) has brought HIV/AIDS patients and non-infected people together in almost 375 business partnerships to date for the purpose of reducing negative stereotypes, breaking down social barriers and preventing the spread of HIV/AIDS. Backed by a $300,000 grant from the Pfizer Foundation, PTK has provided small business loans through the Population & Community Development Association since 2004 and is considered a “Best Practice” by UNAIDS. *Pfizer*

**2004 Tsunami**

- Since the 2004 tsunami, hospitals and health centers in the affected area have received $1.64 million in cash and medicines, donated by Pfizer and its employees. *Pfizer*

**Psychological Rehabilitation Relief Efforts**

- Pfizer teamed up with the Department of Mental Health, Ministry of Public Health, to establish a Mental Health Recovery Center and organize PTSD conferences for psychiatrists, psychologists, social workers and nurses to deal with the mental health effects of disaster trauma. *Pfizer*

- Community outreach and mental health education to children in the affected area. *Pfizer*

**Scholarships for Science and Medical Students**

- Since 2003, 141 Pfizer scholarships totaling $148,000 have been awarded to high school and university students who have demonstrated high academic performance and financial need. The aim is to encourage the study of science, medicine, pharmacy or public health. *Pfizer*
Clinical Research

- Since 2004 Pfizer has conducted more than 40 global clinical studies in Thailand (mostly in phase III and phase IV) in many therapeutic disease areas. Pfizer also has supported efforts to make Thailand a center of excellence in clinical trials and continues to partner with government agencies in developing the capacity of local healthcare professionals to provide better care and service. Initiatives include:

  - Pfizer partnership with the Disease Control Department, the Thai Food & Drug Administration, public hospitals, Medical Sciences Department and medical schools conducts “Good Clinical Practice” training for research physicians and healthcare professionals involved in clinical research. More than 3,600 investigators and their research team have participated since 2000.

  - Pfizer and the Pfizer Thailand Foundation have contributed nearly $195,000 to a partnership with the Disease Control Department of the Ministry of Public Health to train 800 physicians, nurses and counselors to provide medical and social care for HIV/AIDS sufferers. The partnership also has developed a Web site to provide channels for consultation and exchange of information with HIV/AIDS experts. This project, which began in 2004, continues through June 2007. Pfizer

Agency for Information and Mediation for Children

- On Thailand’s highly militarized border with Burma, the Agency for Information and Mediation for Children (AIM) provides support for refugee children affected by the conflict with ethnic minorities. With support from sanofi-aventis, AIM operates orphanages and schools and offers education in hygiene and medical care and vocational training for the women. sanofi-aventis

VIETNAM

Operation Smile

- Since 2002 Abbott has been Operation Smile’s sole source of sevoflurane, donating the general anesthesia for use in over 3,000 surgeries in 30 missions every year. In 2006 Abbott has so far shipped 1,138 bottles. At Operation Smile’s first medical mission in Vietnam in May, the Abbott product was used to perform 102 reconstructive surgeries on children and young adults. Abbott
In September 2006, Abbott received Operation Smile’s Corporate Humanitarian Award for the company’s long history of outstanding citizenship and philanthropic efforts. “We are pleased to honor Abbott’s commitment to providing access to medicine and treatment to the patients who need it most,” said Dr. William P. Magee, co-founder and CEO, Operation Smile. “Abbott’s contributions have helped us to put smiles back on the faces of thousands of children throughout the world.”

Giao Diem Medical Outreach Programs

- Abbott has donated a total of $264,000 in medicines, vitamins, nutritional supplements and hospital supplies to AmeriCares and MAP to support relief and humanitarian programs by Giao Diem Medical Outreach Programs, as well as Operation Smile. Included is more than $210,000 in infant nutritional supplements. Abbott

Children’s Nutritional Program

- With support from Abbott, Abbott Fund and AmeriCares, Giao Diem’s Children’s Nutritional Program now reaches an additional 40 classrooms throughout four provinces, bringing the total number of participating children to 2,000. Launched in 2004 as a pilot, the program provides health education training to families and staff and locally produced foods, vitamins and nutritional supplements to school children. After only ten months, the incidence of low weight was cut from 54 percent to 15 percent, and anemia, from 51 percent to 9 percent. Abbott

Pediatric AIDS Support

- With grants to date totaling $140,000, the Bristol-Myers Squibb Foundation is helping train healthcare professionals in pediatric HIV/AIDS treatment, using the HIV Curriculum for Health Professionals designed by the Baylor College of Medicine resulting from the SECURE THE FUTURE program. Bristol-Myers Squibb

500 Ethnic Midwives Program

- With a goal of 500 new midwives for the ethnic minority communes and funding of $335,000, GlaxoSmithKline created the “500 Ethnic Midwives Program,” in partnership with Tu Du Hospital and Ho Chi Minh City Women’s Association. 121 women from Kontum, Daknong
and Gia Lai provinces have trained and returned to their communities; another 91 from other provinces are in training. Pregnancy care, vaccinations, childhood diseases, birth control, hygiene and infectious disease prevention are also taught. A new 1.832 sqm, five-story training center opened in 2006. GlaxoSmithKline

A Personal View of Midwives Program

“I know how valuable this is to improve the lives of women and children in my village. …My understanding of life and science through the course has [also] improved my living skills,” said 22-year-old nursing student Chama Lea Thi Quynh, a Raglay ethnic woman from Ninh Thuan Province.

Viet Nam News, May 22, 2006

International Center for Equal Healthcare Access

• The International Center for Equal Healthcare Access, with a $36,000 grant from the Merck Company Foundation, runs HIV/AIDS training workshops for healthcare providers in the Highland Provinces of Vietnam. Merck & Co., Inc.

International Trachoma Initiative

• The International Trachoma Initiative, co-founded in 1998 by Pfizer and the Edna McConnell Clark Foundation, operates in 13 developing nations, including Vietnam where it has achieved a 75 percent reduction in active infections. Worldwide, ITI has given 40 million treatments of Zithromax® (azithromycin) to trachoma patients; since 1998 it has trained thousands of health workers around the world who, in turn, have completed more than 239,000 surgeries to treat advanced cases of trachoma. Pfizer

Caring for the Poorest of the Poor

• With sanofi-aventis by her side, a Franciscan nun named Sister Elisabeth has offered hope and opportunity to the most destitute for more than 10 years. Sister Elizabeth operates five dispensaries, schools to combat illiteracy and provide basic instruction, homes for street children, and a center that teaches blind girls; she also provides medical and dental care in the regions where the need is greatest. sanofi-aventis
REGIONAL PROGRAMS

Project HOPE and the USNS Mercy

- In April 2006 the USNS Mercy, in partnership with Project HOPE, embarked on a five-month mission, bringing together multidisciplinary medical teams to provide vital care in Indonesia, Philippines and elsewhere in the Western Pacific and South East Asia. This is a first ever Navy-NGO collaboration “not initiated by crisis but simply by a desire to assist our neighbors.” At Project HOPE’s request, Abbott donated 12,000 bottles of the antibiotic Biaxin, enough to meet the mission’s needs. Abbott was recently honored for its contribution by the captain of the USNS Mercy, the President and CEO of Project HOPE and the U.S. Ambassador. Abbott

Product Donations and Financial Assistance

- In 2005 Bristol-Myers Squibb donations of approximately $70 million wholesale value were given to programs in Asia and throughout the world, including:
  - Over $32 million worth of medicines donated to Direct Relief International to support long-term healthcare programs, medical missions, and disaster relief in Asia and elsewhere.
  - $15 million dollars worth of product donations distributed by AmeriCares; since 1982, AmeriCares’s partners have received and distributed close to $250 million (wholesale value) of BMS products worldwide.
  - Products valued at $4.8 million wholesale donated to MAP, including the Travel Pack program, which distributes boxes of needed medicines and medical supplies to medical missions in Asia and throughout the developing world.
  - Working with Interchurch Medical Assistance, products valued at $1.8 million were used to treat poor and disadvantaged people in 47 countries throughout the world, including Asia. Bristol-Myers Squibb

TREAT Asia

- The Foundation for AIDS Research’s TREAT Asia program teaches the proper, safe and effective use of HIV therapeutics to clinicians and other health workers in 25 clinics across 12 countries in Asia. With support
from GSK’s Positive Action, treatment literacy projects, using TREAT Asia materials, are running in Vietnam, Thailand, Cambodia and China and reach women, IV drug users, men who have sex with men and others.

**Asian Community for AIDS Treatment and Advocacy**

- Reminding governments of the crucial role that people with AIDS can play in expanding access to effective treatment is the goal of the Asian Community for AIDS Treatment and Advocacy. It helps PWA and other community organizations develop advocacy and communication skills and strategies; many have since addressed national, regional and international conferences. *GlaxoSmithKline*

**National AIDS Manual**

- The training and continuing professional development of health professionals is essential to reducing the risk of drug resistant strains of HIV. With support from Positive Action, UK-based National AIDS Manual is training health workers and distributing (translated) training materials, newsletter, and CD ROMs in resource-limited nations in Asia and elsewhere. *GlaxoSmithKline*

**Regional and International AIDS Conferences**

- People living with HIV and AIDS and community organizations in Asia (and elsewhere) participate in regional and international AIDS conferences where they interact with other leaders in AIDS policy, research and programming. With support from Positive Action, organizations representing young people, migrant workers, indigenous populations, commercial sex workers, men who have sex with men and intravenous drug users attend education, treatment, advocacy and communication workshops at regional conferences. *GlaxoSmithKline*

**Elizabeth Glaser Pediatric AIDS Foundation**

- The Elizabeth Glaser Pediatric AIDS Foundation first partnered with Johnson & Johnson in 2003 for the prevention of mother-to-child transmission of HIV. In 2005 the partnership spanned 9 countries, reaching more than 340,000 pregnant women with HIV counseling and testing at hundreds of healthcare facilities. In 2006 the partnership will reach more than 260,000 pregnant women at nearly 460 healthcare facilities in China, India, Cameroon, Dominican Republic, Russia and
Zimbabwe. In China, Glaser is reaching 17,000 women with testing and counseling services at 18 locations throughout the country.

**Johnson & Johnson**

**Save the Children**

- Since 1998 Johnson & Johnson has partnered with Save the Children in efforts to educate children and their families in the Philippines, Vietnam and Thailand about child development, health and nutrition. The partnership’s first project involved integrating personal, community and environmental hygiene instruction into school curricula in Thailand.

**Global Health Fellows**

- Pfizer’s Global Health Fellows program sends company scientists, doctors, nurses and other colleagues to developing countries for up to six months to work with NGOs and multilateral organizations, fighting HIV/AIDS, tuberculosis, malaria and other diseases. Since 2003 more than 100 fellows have volunteered to work with 23 NGOs in 29 countries in Asia and elsewhere to deliver healthcare and train and support local health professionals. Program partners include the Academic Alliance Foundation, American Jewish World Service, Doctors of the World and Project HOPE.

**Combating Childhood Cancer**

- 80 percent of children with cancer live in developing countries, where the disease will kill more than one child in two. With $750,000 per year in funding from sanofi-aventis, the company and the International Union against Cancer have launched My Child Matters, a pilot program that provides care and support to children in 16 pilot countries, including Indonesia, Philippines and Vietnam. The programs provide information...
to families and training for health professionals in early detection, proper care and treatment, pain management, and social welfare.

**MAP International**

- Schering-Plough supplies MAP International with free medicines and medical supplies for MAP’s Travel Packs, which are given to physicians and healthcare workers on medical missions in remote regions of Asia and elsewhere. The company’s donations include antifungal creams, topical creams, allergy medicines, vitamin-enriched ointments and other medicines and supplies critically needed in the developing world.

**Smiles Program**

- Beginning in 2006, financial support for the World Vision’s Smiles Program, which includes a number of local projects that involve the delivery of clean water systems, food and milk, along with other sustaining elements, to underprivileged communities.

**World Federation of Hemophilia**

- Since 2001, the World Federation of Hemophilia’s Twinning Program, with major support from Wyeth, has paired treatment centers and hemophilia patient organizations in developed countries with centers and organizations in developing countries. As of March 2006, 26 pairs of centers and 17 pairs of organizations were sharing knowledge regarding diagnosis, treatment, support and center management.

- The Global Alliance for Progress is working to increase the diagnosis and treatment of people with hemophilia in up to 30 developing countries over the next 10 years. With support from the WHO, Wyeth and others, new national programs for hemophilia care, training and education are being implemented.

**South Asia Earthquake Relief Fund**

- Wyeth presented a $1 million cash donation to the South Asia Earthquake Relief Fund to aid in the relief and reconstruction efforts in the areas devastated by the 2005 Pakistan earthquake. Antibiotics, vitamins and other necessary medicines also are being donated—including 1 million single unit doses of HibTiter®, a vaccine against Haemophilus influenzae type b.
2004 Tsunami Relief

- $600,000 was donated, mostly through UNICEF and the Red Cross, in the immediate aftermath of the Asian tsunami in December 2004. AstraZeneca

- Bristol-Myers Squibb provided $1.2 million in direct assistance and $7 million wholesale value in donated medicines and other needed products to relief agency partners, including Northwest Medical Teams, Direct Relief International, AmeriCares, Project HOPE, MAP International and Interchurch Medical Assistance. Bristol-Myers Squibb

- BMS’s support for the Interchurch Medical Assistance includes donated antibiotics for IMA’s Medicine Boxes. After the tsunami, enough boxes to treat 600,000 adults and children were shipped to Indonesia, Sri Lanka, Thailand and India. Bristol-Myers Squibb

- BMS employees themselves donated more than $330,000 to tsunami relief agencies, contributions matched dollar-for-dollar by the BMS Foundation. Bristol-Myers Squibb

- In early 2005, Lilly donated more than $2 million in cash to relief agencies to help victims of the catastrophic tsunami. Working through the Catholic Medical Mission Board (CMMB), Lilly also donated antibiotics to treat up to 60,000 patients. Lilly

- Merck contributed a cash donation of $3 million: $1 million each to the American Red Cross and U.S. Fund for UNICEF; and $1 million shared by Project HOPE, Academy for Educational Development and the Keenan Institute. Merck & Co., Inc.

- An additional $1 million was donated to the American Red Cross, the U.S. Fund for UNICEF, and Save the Children, one-half by Merck employees worldwide and the other through Merck’s Disaster Relief Matching Funds Program set up by the Merck Company Foundation. Merck & Co., Inc.

- $7.4 million in Merck medicines and vaccines were donated for tsunami relief to Project HOPE, Direct Relief International, Interchurch Medical Assistance, MAP International and Heart to Heart International. Merck & Co., Inc.

- Pfizer provided $10 million to relief organizations operating in the region, more than $45 million in health product donations and an additional $1.5 million in individual employee and company-matching donations. Pfizer
• Sanofi-aventis dispatched 7 tons of drugs and financial support amounting to $500,000 to relief agencies in the region. In addition, $1.04 million was donated by the company and its employees worldwide to support rebuilding businesses, housing, water and sanitation systems, care facilities and schools, as well as providing psychological and social support. Partners included Father Ceyrac Association, Red Cross, Enfants du Mekong, Handicap International, Isha Foundation, Servodaya, Sewelanka, SEEDS, Solidarities, SOS Children’s Village and UNICEF.

• Schering-Plough Corporation has contributed nearly $10 million in pharmaceutical products to the region’s recovery efforts. A cash donation of nearly $175,000 was made to the International Federation of Red Cross, Red Crescent Societies and other relief organizations working in the region. Schering-Plough

• $1 million cash donation for tsunami disaster relief to international relief agencies such as the Red Cross and AmeriCares. Wyeth
Global Alliance for TB Drug Development

- The Global Alliance for TB Drug Development brings industry, NGOs, governments and foundations together to work with more than 30 partners around the world to accelerate the discovery and development of cost-effective, new anti-TB medicines. Major partners include Bayer HealthCare, Novartis India, the Bristol-Myers Squibb Foundation, the Association of British Pharmaceutical Industry and other pharmaceutical organizations, the Global Forum for Health Research and the Bill & Melinda Gates Foundation. Bristol-Myers Squibb

Hepatitis B

- In 2006 the BMS Foundation’s Freedom to Discover program awarded $500,000 to Prof. Stephen Locarnini of the Victorian Infectious Diseases Reference Laboratory. The award funds research into the mechanisms of hepatitis B infection, including how the virus comes to resist certain anti-viral therapies, by monitoring the genetic makeup of patients and the viruses that infect them. Bristol-Myers Squibb

Academy for Clinical Excellence

- In India, Pfizer established an Academy for Clinical Excellence in partnership with the Bombay College of Pharmacy and developed curriculum for certificate and postgraduate courses in clinical research. The goal is to train clinical research professionals. Pfizer

- More than 75 workshops on clinical research have been conducted in India. Pfizer

- Six osteoporosis centers with advanced diagnostic capabilities have been established in Mumbai, New Delhi, Hyderabad, Chennai, Vellore and Jaipur, all in India. Pfizer
R&D in China

- Established in 2005 and recently relocated to Zhangjiang High-tech Park, Pfizer’s R&D Center will introduce innovative medicines to China faster and support training in internationally-recognized Good Clinical Practice standards in China and other Asian nations. Pfizer has announced publicly that it will invest $25 million in the next five years and expects to employ 150 professionals by the end of 2006. Pfizer

R&D in South Korea

- Pfizer is committed to developing Korea’s research and development capabilities and has announced publicly that it expects to invest $19 million in R&D in 2006, double the amount for 2005. In one project, Korean doctors are serving as the principal investigators on Korea’s first multinational gastric cancer-related clinical trial. Pfizer
HIV/AIDS

- Bristol-Myers Squibb granted Emcure Pharmaceuticals, an India-based generic drug maker, a royalty-free license in early 2006 to make and sell BMS’s latest AIDS medicine in India. BMS also will provide Emcure technical training on the manufacture, testing, packaging, storage and handling of the medicine’s active ingredient. **Bristol-Myers Squibb**

“This agreement represents the kind of innovative collaboration needed to increase access to antiretrovirals in the developing world.”

-Mark Dybul, M.D.,
Deputy U.S. Global AIDS Coordinator.

Global Programme to Eliminate Lymphatic Filariasis

- Since 1997 GlaxoSmithKline and the WHO have partnered to run the Global Programme to Eliminate Lymphatic Filariasis. GSK has committed to donate albendazole, an antiparasitic medicine, to every country that needs it until the disease is eliminated. The goal is to spare future generations from elephantiasis, hydrocele and other manifestations of LF. **GlaxoSmithKline**

- GSK has donated over 500 million albendazole treatments to 42 countries affected by LF—25 of them are in the Asia Pacific region, where 350 million albendazole tablets have been shipped. Specifically, GSK has donated albendazole to Cambodia, Indonesia, Malaysia, Philippines, Sri Lanka, Thailand and Vietnam, among others. **GlaxoSmithKline**

SARS Outbreak

- 13,500 Fluarix influenza vaccine doses worth almost $365,000 were donated to high-risk, frontline medical workers at six hospitals, all polyclinics under Singapore’s National Healthcare Group and SingHealth Group, and charity homes. **GlaxoSmithKline**

Other Infectious Diseases

- Vaccines against influenza, chicken pox and hepatitis donated annually to needy elderly and children in charity homes. **GlaxoSmithKline**
Humanitarian Relief

- In 2005 medicines and vaccines valued at $49 million were donated by GSK for international relief efforts. More than 100 countries worldwide received donated medicines, including Cambodia, China, India, Indonesia, Laos, South Korea, Sri Lanka, Philippines, Thailand and Vietnam, among others in the Asia Pacific region. From warehouses run by partner organizations’ response networks, large quantities of essential medicines are delivered quickly where needed. GlaxoSmithKline

- GSK antibiotics and other medicines were donated to communities affected by the tsunami, as well as other natural disasters such as typhoons in the Philippines and the earthquakes in Pakistan and Indonesia. GlaxoSmithKline

- Merck donates medicines in times of need throughout the Asia Pacific region, most recently, medicines for tsunami disaster relief and to the Zhongshan Community Hospital in Hong Kong for its “Heart to Heart” project. Merck & Co., Inc.

Glivec International Patient Assistance Program

- Novartis initiated the Glivec International Patient Assistance Program (GIPAP) to help poor patients who suffer from a specific form of leukemia and gastrointestinal stromal tumors and would not otherwise have access to this breakthrough medicine. Since its inception in 2002, GIPAP has spent $259 million in India, reaching more than 6,200 patients. Novartis

Leprosy

- Novartis is providing free treatment for leprosy patients worldwide, in a pioneering collaboration with the World Health Organization. More than 4 million people have been cured through the use of Novartis’ multi-drug therapy—during 2005, the number of new cases detected worldwide fell 21 percent from the previous year. Total value of the donation for the period 2000-2004 was $37.5 million. Novartis

Malaria

- A 2001 partnership between Novartis and the WHO is helping stem the spread of malaria. The company supplies Coartem at cost, while WHO distributes it through its extensive support networks. Novartis
Tuberculosis

- Under a five-year agreement signed in 2003 with the WHO, Novartis is donating fixed dose combination tablets in blister packs, a gold-standard treatment against TB, to treat 500,000 patients in the world’s poorest countries, including nations in Asia. Leading the program is the Novartis Foundation for Sustainable Development. Novartis

Miscellaneous

- Novartis regularly donates medicines to NGOs and welfare associations, including Jagruti Palak Sanstha, an NGO working for mentally challenged persons; Akhil Welfare Trust, an NGO working for the benefit of physically handicapped people; and the Rotary Club of Mahad, Maharashtra. Novartis

Diflucan Partnership Program

- Since 2000 Pfizer has donated its anti-fungal medicine, Diflucan® (fluconazole)—through its Diflucan Partnership Program—to ministries of health and NGOs in developing countries for the treatment of debilitating fungal opportunistic infections. The program has donated approximately $470 million worth of Diflucan, helping people in 47 countries hardest hit by HIV/AIDS, including Cambodia, Vietnam and Thailand. The program also has trained 20,000 health professionals in the diagnosis and treatment of fungal opportunistic infections. Pfizer

Global Polio Eradication

- Sanofi pasteur, the vaccine division of sanofi-aventis, is the largest corporate donor to the Global Polio Eradication Initiative spearheaded by UNICEF, WHO, Rotary International and the US Centers for Disease Control and Prevention. In 1988, when the World Health Assembly committed to eradicating poliomyelitis, 350,000 children were paralyzed by polio. In just thirteen years, vaccines have since reduced the number of polio cases by 99 percent. Sanofi pasteur has donated 120 millions doses of oral polio vaccine for the immunization of children in several countries all over the world. sanofi-aventis

- Since 2005 a partnership between Sanofi pasteur, WHO and the Government of Indonesia has been introducing the injectable polio vaccine in Yogyakarta province, as a substitute for oral polio vaccine. Beginning in early 2007, the company will provide free immuniza-
Anti-Fungals, Antihistamines and Others

- Anti-fungal medicines were donated to China’s Tibetan Medical College, Yushu. Schering-Plough

- The Memphis Mission of Mercy in Bayawan, Philippines, received donations of topical anti-fungal cream for skin disorders. Schering-Plough

- The Luang Pragang Provincial Hospital in Laos received antihistamines for adults and children free of charge. Schering-Plough

- In India, Meenakshi Mission Hospital, Madurai, and the Sonada Tibetan Refugee Settlement, Sonada, received donations of antihistamines to treat hives and respiratory problems, as well as anti-fungal creams for skin disorders. Schering-Plough

- Schering-Plough donated vitamin A&D ointment, sunburn relief gels, antihistamines, anti-fungal creams, antibiotics and other products to countries throughout Southeast Asian, including Cambodia, South Korea, Sri Lanka and Vietnam. Schering-Plough
